

Spokane River Toxics Sovereigns Meeting

Draft Agenda

August 12, 2013

2 pm – 3 pm

1. Introductions and Review of Agenda

- Are there any additional items to discuss?

2. Measurable progress discussion

- A. How does this topic impact you or your organization?
- B. What do you think embodies measurable progress toward meeting water quality standards for those?
- C. How do you think the Department of Ecology would define measurable progress?
- D. Do you think others on the SRRTTF would define it the same way as either you or Ecology? If not, how would other parties define it?
- E. What is the best-case scenario for HOW measurable progress is determined? What is best case for what measurable progress is defined as?
- F. What would you describe as the major issues associated with this topic?
- G. What do you think a fair outcome would look like?
- H. What concerns or challenges would need to be addressed?
- I. What suggestions do you have for resolving those concerns or challenges?
- J. Do you have specific examples of something you are currently measuring that can be used to assess (directly or indirectly) reductions of PCB in the Spokane River?
- K. What should we have asked that we did not?
- L. Is there anything else that should be discussed or questions that you have?
